Dear Parent/Carer,

As part of our ongoing commitment to safeguarding and supporting our Sixth Form students, we will shortly be installing additional safeguarding software on Sixth Form laptops. This software is already in use across the rest of the school and forms an important part of our wider safeguarding systems.

The software provides enhanced safeguarding features designed to help keep students safe while using their devices. It supports student wellbeing by monitoring internet activity both in and out of school and enables proactive safeguarding responses when devices are being used on the school site. These measures help us to identify and respond promptly to any potential concerns, ensuring we continue to meet our duty of care to students in our Sixth Form.

This change is being introduced to maximise student safety while still allowing students to use their laptops independently for learning, research, and study, both in school and at home. Once a student leaves the Sixth Form, the safeguarding software will be removed from their device.

If you have any questions or would like further information about this safeguarding software, please do not hesitate to contact the school.

Thank you for your continued support in helping us keep our students safe.

Yours sincerely,

Rossi Distefano
ICT Network Manager
